

## CALL FP6-2005-Innovation-8, DG Enterprises

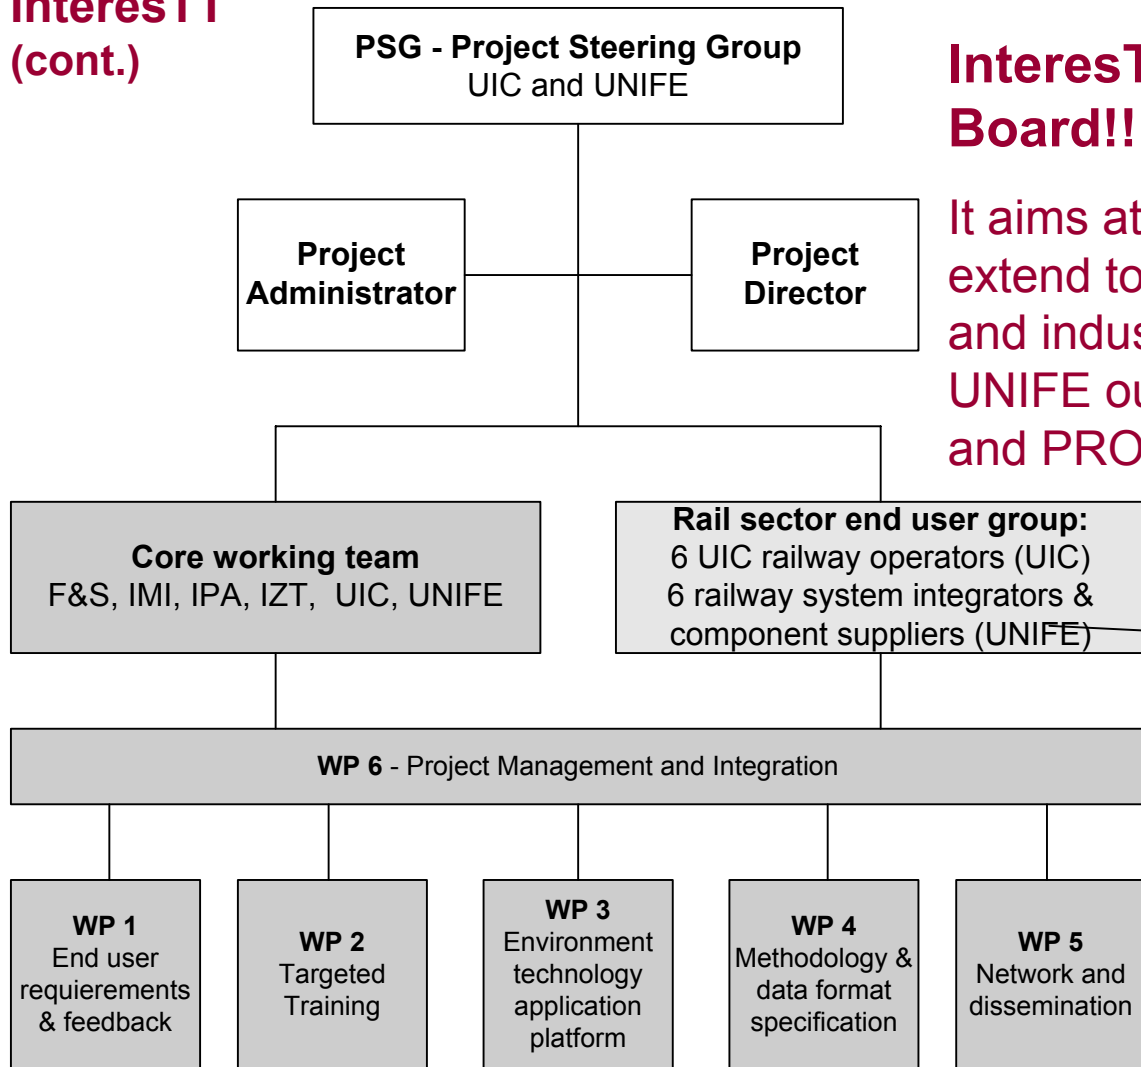

### InteresTT

Integrated Rail Sector Eco-design & Procurement – Harmonized Specifications, Training, Technology Application Platform and Standardisation Roadmap

- Instrument: Coordinated Action
- Duration: 36 months; Budget : 0,8Million Euros
- Partners: UIC (DB), UNIFE (UNIFE T&E WG), IZT, Chalmers and Fraunhofer Institute IPA, Frost & Sullivan
- Coordinator: UIC (Environmental Forum)
- Objectives: adaptation to practical use of the scientific approach of the eco-design methodology and data formats for the rail product development of the Eco-design methodology and data formats for the rail product development and manufacturing as developed in the projects REPID and PROSPER
- Topics: Eco-design & Eco-procurement within the rail sector; Harmonization and pre-standardisation of the methodology and data formats; targeted training
- Strategic objectives: facilitate de integration of open standards into the design of new products and services; facilitate de integration of the standards into business process
